Pibbs has a wide variety of full length mirrors to compliment just about any type of salon décor.

From our illuminated LED mirrors to our classic framed designs, we are sure to fulfill all your design criteria. But what is style without function? To add function to all of our full length mirrors, we have designed the Server series of storage cabinets. The idea of the Server was to provide a clean, functional and plentiful storage option to our full length mirrors. The stylist gains plenty of function with the ample tool and storage features built into each server. All this while the client sees the beauty of the mirrors and none of the clutter as all of the storage is maintained behind the mirror.

This design is great for maintaining a clean, elegant look all the while maximizing the use of available space. The servers are available as both a single unit to mount against a wall, with or without an optional base and as a back to back unit giving you two self standing stations within a minimal footprint. The finishes available for the servers vary and most are available in the following shades.
